

**Outlier Ventures**

## **The Convergence Stack**

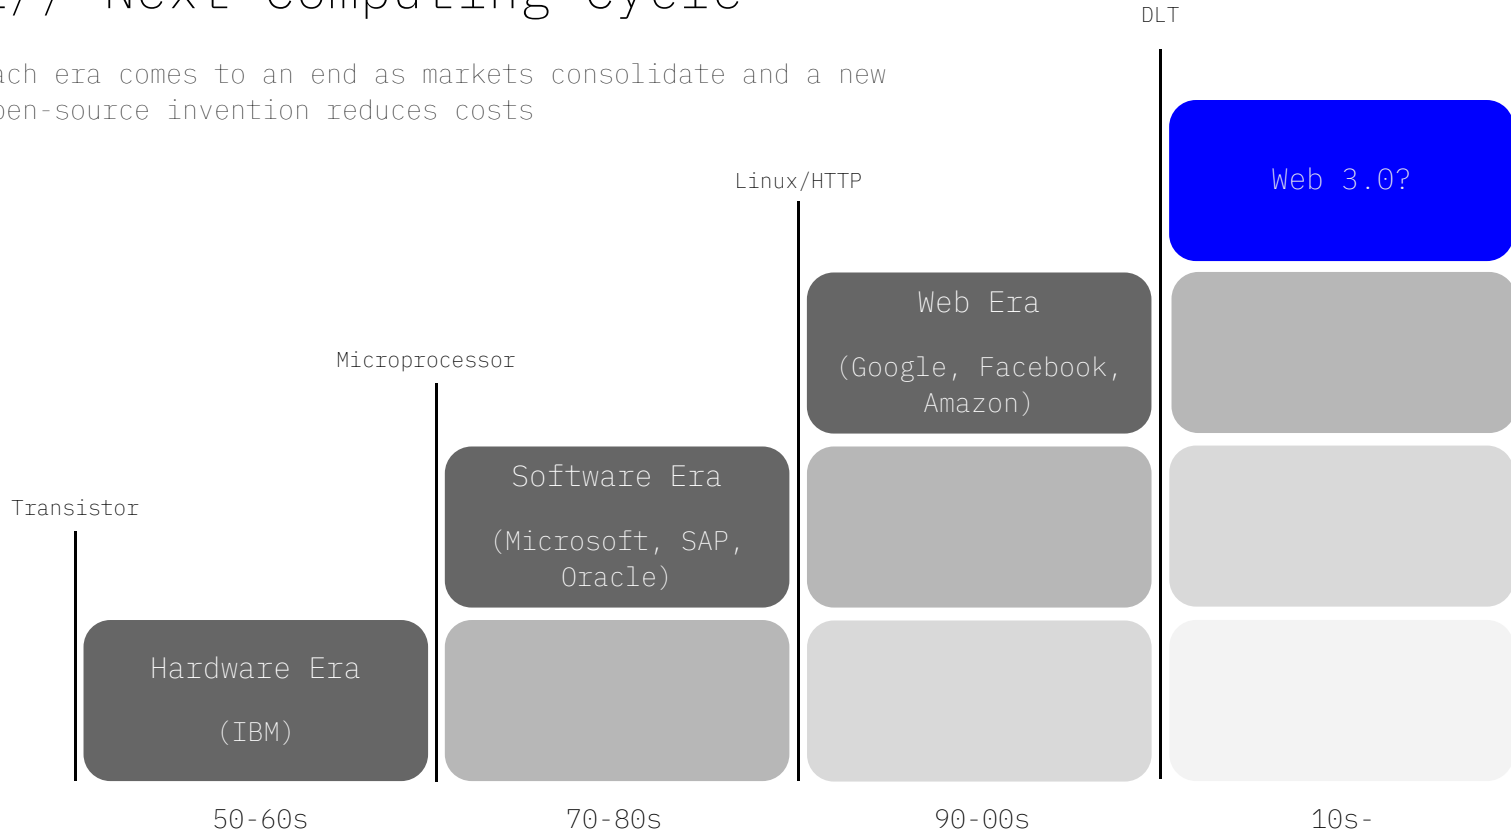

Creating a New Data Economy with DLT

Lawrence Lundy-Bryan, Partner

6th November

# 1// Next Computing Cycle

Each era comes to an end as markets consolidate and a new open-source invention reduces costs

# 2// Data Production

Data is produced by devices at the edge

Consumption  
(AI)

---

Distribution  
(Crypto)

---

Production  
(IoT)

Hardware Processing

Hardware Storage

Hardware Networking

# 3// Data Distribution

Open-source, non-custodial, privacy-preserving tools to distribute data

Consumption  
(AI)

Authentication

Query

Compute

Distribution  
(Crypto)

Scaling

Databases

Bridges

Ledgers

Storage

Networking

Production  
(IoT)

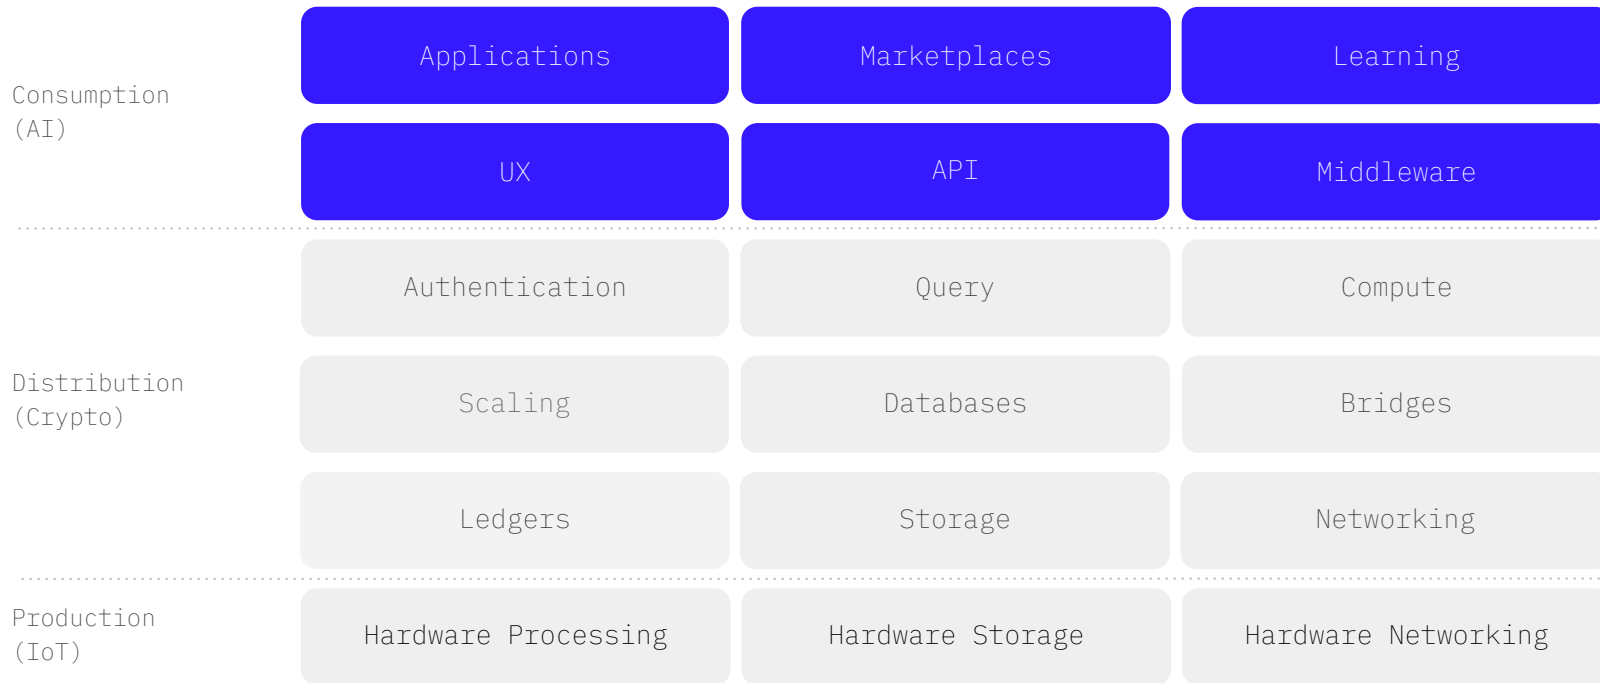

Hardware Processing

Hardware Storage

Hardware Networking

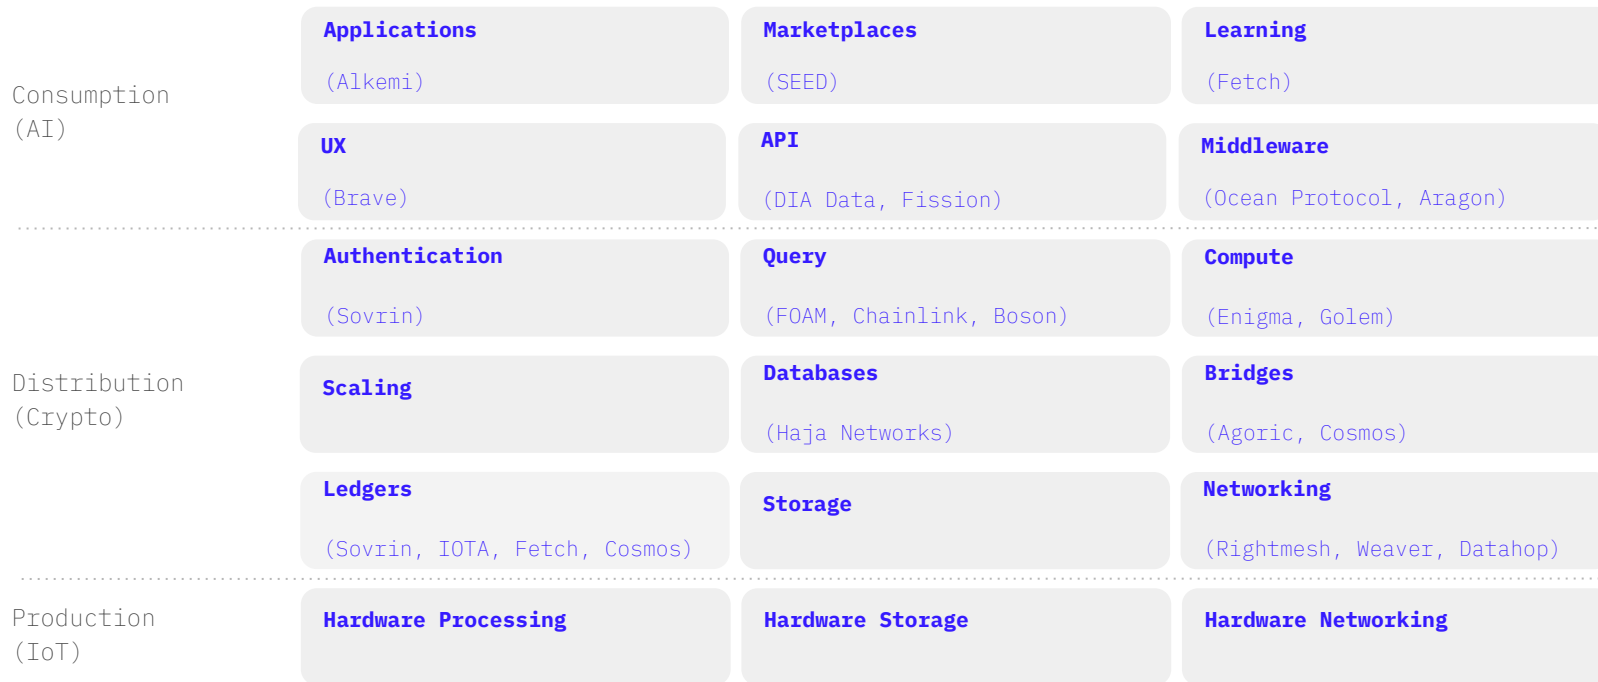

# 4// Data Consumption

Applications utilise open-source, non-custodial, and privacy-preserving tools to deliver new services

# 5// The Convergence Stack

Outlier Ventures is actively deploying capital and resources to make this new data economy a reality
